

Vent 3 Pro Breathable Roofing Membrane by Cromar

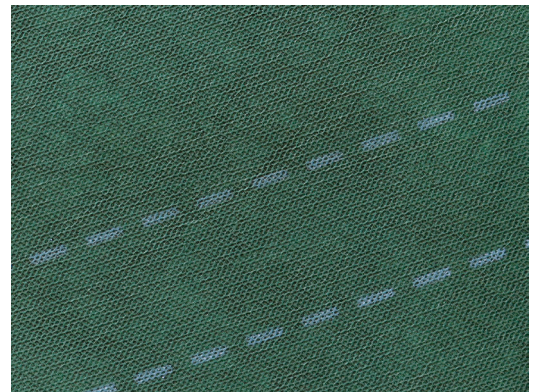

Vent 3 Professional Breathable Roof Membrane by Cromar is a durable underlay for roofing, providing excellent weather protection and ventilation for cold and warm roof installations.

Key Benefits

Vent 3 Pro is a high-performing, three-layered breathable fabric membrane, manufactured from highly flexible polypropylene layers which have been bonded around a micro-porous polypropylene film. Designed to be used with an unsupported or fully supported slated, tiled or metal roofing system Vent 3 Membrane has ultra-high permeability for moisture and vapour whilst keeping a superior level of water resistance. Vent 3 Pro Breathable Roofing Membrane has a pale green top surface with a white face beneath.

- Easy to use and clean
- Flexible, 3-layer membrane
- Excellent tensile strength
- Durable and long lasting
- UV stable (three months exposure)
- Applicable on cold and warm roofing
