

30MM

SQUARE TWIST NAILS DECKING SUBFRAME

Cladco M3.75 x 30mm Square Twist Nails are made from Sherardised steel providing longevity and resistance when fixing Face Fix Joist Hangers to your Decking subframe.

COLOUR RANGE

SHERARDISED

SPECIFICATIONS

Size	M3.75 x 30mm
Pack Size	1kg (approx. 400)
Material	Sherardised steel

TEST CERTIFICATIONS

EU Standards	CE EN 14592
Service Class 2	EN 1995-1-1
Tensile Capacity	8.54 N/mm ²
Yield Moment	5152 N/mm

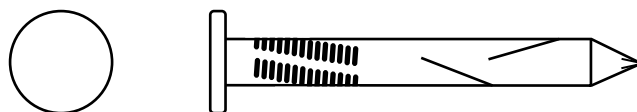

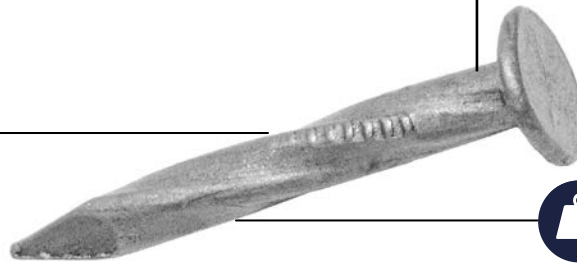

Diagram is not drawn to scale.

Sherardised coating provides corrosion resistance.

3.75mm shank width for use with positive placement nail guns.

Twisted shank increases load-bearing support.

MATERIALS

Square Twist Nails are made from Sherardised steel for excellent durability.

RESISTANCE

Square Twist Nails improve fixing performance for increased load-bearing support.

ACCESSORIES

Use Cladco Square Twist Nails with Joist Hangers for a secure subframe.

LOW MAINTENANCE

Sherardised steel requires little to no maintenance, once installed into timber subframes.

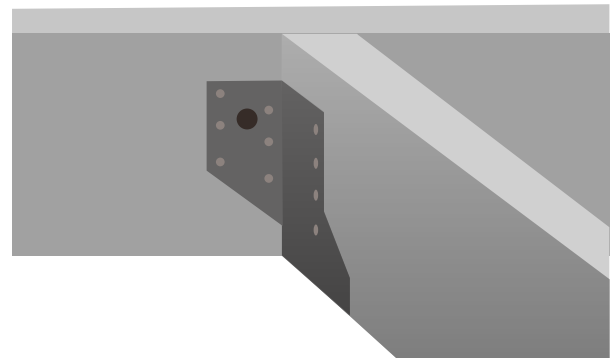

LONG LASTING

Sherardised steel protects from rust and corrosion for a long-lasting Decking subframe.

INSTALLATION ADVICE

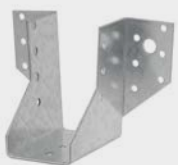

Install using 30mm x 3.75mm Square Twist Nails through the 6mm holes in steel Joist Hangers using a hammer or nail gun. The hanger depth must be at least 60% of the depth of the supported member to prevent rotation unless additional lateral restraint is applied to the top of the supported member.

We recommend filling all the holes in each Hanger for the best support using the correct size fixings.

For detailed information about installation, please read our Decking Installation Guides.
